

SANDHILLS PUBLIC SCHOOL ANNUAL ASBESTOS NOTIFICATION

The Asbestos Hazard Emergency Response Act (AHERA) passed in 1987, requires all public and private schools to inventory and inspect all buildings in each system for asbestos containing material. (ACM)

Please be advised that these management plans are on file in the school's administrative offices and are open for public inspection during office hours. Complete copies of the management plans are available to anyone who wishes to have one.

Each six months the school is required to have the ACM surveyed to determine if the asbestos material has deteriorated or been damaged in any way.

A listing of all the school district's asbestos containing material is located in the management plan and any action to remove or repair the asbestos is also listed in the management plan, which is open to public inspection.

Sandhills Public Schools contact person is Anita Peterson, and may be reached at the elementary center. Phone: 533-2204

SANDHILLS ELEMENTARY SCHOOL ANNUAL WATER NOTIFICATION

The Sandhills Elementary School is a Non-Transient, Non Community (NTNC) water supply system that serves over 25 people per day. This requires that our elementary center must employ a water operator of a grade IV or above, and must comply with all regulations that are state mandated for a water supply system of this kind. The State of Nebraska also has people in the field who keep a close watch on the individual water providers, and who help the water operators perform as intended.

Anyone wishing to see water sample reports, emergency plan, source water assessment, sanitary survey, operating manuals, or has any questions about the water at the elementary may contact Anita Peterson. All water records are open for public viewing, and may be seen during regular office hours. Please contact Anita at phone 533-2204.
